

CAPITA

5 ways to build faster and better connectivity in the UK

The situation

Connectivity is critical to accelerating growth, driving services to people and boosting productivity in the workplace.

Are you ready to get better connected?

81% of firms see more reliable mobile connectivity as essential

Connected devices will outnumber the population by **seven to one by 2020**

In the UK, fixed internet traffic is set to **double every two years**

The need for **secure, reliable connectivity and access to time-critical data** in schools, research centres, transports hubs and hospitals will be paramount

It's time to get connected!

No matter in which sector you operate, a secure, available and compliant network can drive operational efficiencies, improve service and help achieve best value.

5 ways to build faster and better connectivity in the UK

- 1 Understand your connectivity requirements** to meet future infrastructure needs.
- 2 Use carrier-agnostic networks** to gain greater coverage, network diversity and a high-availability broadband solution.
- 3 Adopt local full fibre networks** for reliable, scalable and robust connectivity at superfast speed.
- 4 Deploy end-to-end security** to protect your network against all forms of cyber-attack, while ensuring your online presence remains available to real users.
- 5 Compliance** requirements can only be met by working with an accredited network provider to support your connectivity plans.

Capita helps you meet the connectivity challenge

We understand the evolving marketplace for connectivity, such as higher speed Ethernet, FttP and 5G.

Our network has incredible reach to provide even the remotest locations with connectivity.

We are dedicated to providing access to private networks, the cloud, the Health & Social Care Network (HSCN), and more, from all locations.

All our services are supported in the UK from 24x7x365 Network Operation Centres.

Delivering world-class network connectivity for the UK
